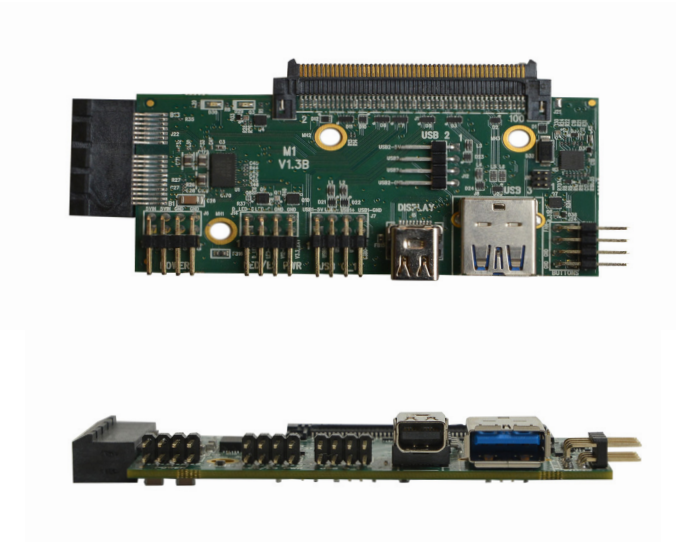
# BIODIGITALPC® - M1

ADDC has developed a micro-form factor docking station for use within integrated products such as monitors, tablets, televisions, and micro client setups. Utilizing a small energy footprint, the M1 is the easiest way to integrate into larger platforms while maintaining standard connections.

The M1 comes complete with a BioDigitalPC® docking connector, one USB 3.0 port, three USB 2.0 4-pin headers, one (optional) PCIe x1 connector, a 5VDC power header, a Mini-DisplayPort video connector, and an external 12V PCIe power header.

BioDigitalPC® products encompass a revolutionary computing system which allows for maximum flexibility with minimum footprint, weight, and energy consumption.



### Tech Specs

| SKU | ADDC-M1-I |
|---|---|
| Size | 87mm x 43mm x 9mm |
| Specs | (1) USB 3.0 connector<br>(3) USB 2.0 4-pin header<br>PCIe x1 connector (optional)<br>5VDC input power header<br>Mini-DisplayPort (HDMI capable) connector<br>Reset and system On-Off headers<br>4A DC-DC Converter (for 3.3V req. in MiniDP & PCIe x1)<br>5V fan header<br>Red 5V power LED indicator and header<br>Green Card Detect LED indicator and header<br>BioDigitalPC® 100-pin docking connector<br>(3) 4mm mounting holes<br>External 12V PCIe power header<br>*Headers are standard 0.1" pitch* |
